

MILKING SHEEP AND GOATS

Efficient Milking and Optimal Workspace

HIGH-QUALITY MILKING SOLUTIONS

SAC offers you complete milking solutions that helps you get the highest possible milk yield with the best possible quality. This has been our focus since the beginning, when first generation of the S. A. Christensen family started the company back in 1938. We develop and market complete milking solutions that optimizes your potential. Milking solutions that are also easy for you to operate, easy-to-service and gentle to the animals. Our focus is to ensure the best for the animal, the milk and the milker – and therefore this is also our vision supporting you at your farm.

WE ARE WHERE THE MILK IS

The SAC family is founded in the Danish agricultural business with a strong focus on high quality, animal welfare and environmental sustainability. We have since then enhanced our family with our Dutch Research and Development center, which gives an added focus on data-driven technology. Today, you can expect us to deliver the best of the absolutely best practices around the world.

You are always ensured support through our 80 years of experience in milking, our knowledgeable people and our professional network with approximately 100 dealers. You get the support and service right where you are.

WE CARE ABOUT HOW YOUR BUSINESS GROWS

It is important to us that your daily work in the barn is good, comfortable and enjoyable. We deliver solutions that ease your daily work in an ergonomically optimal environment and with focus on the animal and her comfort. Together we deliver a high milk yield with the best possible quality – for you to make a sustainable profit.

MILKING THAT FITS YOUR NEEDS AND YOUR HERD

Just how many sheep and goats do you need to milk per hour? It is all about efficiency. Milking a sheep or a goat does not take long.

The milking solution should not prolong this, just because you have, not one but e.g. one thousand animals. The parlour must provide easy in – quick attachment – efficient milking – and easy out. We designed the SAC sheep and goat milking solutions with this in mind – and made it gentle to the animals and easy-to-operate.

OPTIMAL WORKSPACE FOR YOU AND YOUR ANIMALS

Not only do we care about the comfort of your animals, we also care about you. You need an ergonomically optimal and comfortable working space – ensuring that you can work efficiently and fast. In a SAC milking parlour you are always close to the animals during milking. Avoiding long stretches and providing everything within easy reach.

Your animals also need an environment that is sound and where it is easy to move in and out. Giving them enough space, our milking solutions are designed to let you milk more than a thousand animals per hour. The more efficient you can do the milking, the more cost-effective it is.

EASY MAINTENANCE TO STAY PROFITABLE

There are very few things more frustrating than a milking parlour out of order, when you have hundreds of animals who need milking. But still, you do not want to spend hours every day cleaning and maintaining the milking parlour. We know this, and we design our milking solutions both robust and with easy cleaning and maintenance. It keeps your costs of ownership low by limiting your maintenance costs.

FUTURE-PROOFED AND HIGH-QUALITY

Your SAC milking solution will be durable for many years, and it does not grow out of date. You always have access to upgrades and spare parts in the future. You will be able to keep your milking solution running for many years and continually change or add more to your milking parlour, whenever your herd and your needs change.

A milking solution from SAC is built on years of experience and focused research and development. It is a solution that will ensure you high-quality milking – and profit – for many years.

RELIABLE SERVICE AND SUPPORT

You can expect high reliability with our strong and experienced service and support team, wherever you are.

LOCAL AND GLOBAL SUPPORT

If you need advice or help to improve your sheep and goat parlour, we are right here – if it is by phone, online or face-to-face. Our experienced service organization is based on our knowledgeable experts – locally through your local SAC contact and dealer as well as through our global approach.

GET SUPPORT AND HELP, FAST

We know how important it is to have your installation up and milking. That is why our hotline with a global approach can connect to all SAC installations all over the world. This ensures you low response-time and fast help if you experience challenges. We are here to advise and guide you.

LOWERING YOUR COSTS - IMPROVING YOUR YIELD

Our experienced service organization can help you with advice on preventive maintenance and also improvements – lowering your costs and optimizing your solution. This will keep your installation milking efficiently for many years and your animals happy.

For 12 years, the Boisseau family has milked with SAC equipment and they emphasize the reliability and ease-of-operation. Recently, they have upgraded their milking parlour and are fully satisfied with the cooperation with their local dealer Ets Clément. The mounting and service were very efficient and of high quality.

They upgraded the existing 2x20 side-by-side parlour to a 2x30 side-by-side with 60 IDC1s and quick-start. They also installed a Unipump (vacuum pump) improving the milking process and it operates with minimal noise.

For the Boisseau family the robust equipment, high durability and the good service from the local dealer makes the difference.

FACTS ABOUT THE BOISSEAU FAMILY

- The Boisseau family is second generation at the farm
- They milk the goat breed Saanen at the farm
- The family currently milks 400 goats and expects to grow to 800 goats
- The goats are being feed with dry feed based on alfalfa
- Average yield per goat per year is 1.000 liters
- The goat milk from the farm is processed into yogurt.

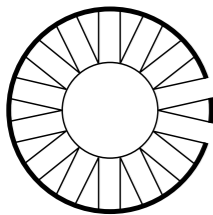

YOU WILL BENEFIT FROM OUR KNOWLEDGE SHARING

To ensure that the SAC-family is always on top of knowledge and tomorrow's technology, we share our knowledge and experience at the SAC Academy. This is our training facility for SAC-dealers and technicians, and with this, you are ensured the best possible service and support.

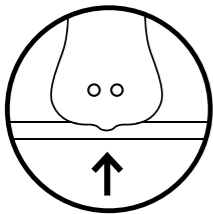

WELL-DESIGNED MILKING PARLOURS

Rapid animal throughput, easy operation and high-quality output. Whether your herd is small, very big or any number of animals in between, you can get an efficient milking solution that fits your needs. And your herd. With careful transport of the milk to keep a high-quality output.

MORE THAN 1.000 ANIMALS AN HOUR

Our external rotary is an easy-to-use solution with a very high capacity for large herds and high-yield milking. You can milk more than 1.000 animals per hour. The ergonomic design lets you attach an animal every three seconds.

A FLEXIBLE SOLUTION CLOSE TO THE ANIMALS

With a side-by-side solution you work close to the animals and have a good overview. The side-by-side solution is easy-to-use and gives you great flexibility as it is easily upgraded.

OPTIMAL WORKSPACE AND ANIMAL COMFORT

With easy access and the right amount of space, every SAC milking solution gives your animals good comfort.

GET MORE OUT OF YOUR MILKING

Our future-proofed Management Dairy Platform offers you the best security and overview of both your milking and your animals.

Our Management Dairy Solution enables you to concentrate on the parameters most important for your business – based on real-time data.

IDC, touch screen, Saturnus. All our management solutions are built on knowledge from competent experts and many years of experience in dairy farming.

SOLVE CHALLENGES ANYWHERE, ANYTIME

You can access the data from your herd – no matter where you are: On your computer in the office or on a touch screen near the animals. You can always react to issues brought to your attention – making the right decisions in time.

With the **Saturnus** Management Solution you get a data-driven management platform that gives you an easy overview of data – at herd level as well as individual animal level. You will have everything in one place and it helps you manage the daily routines in the installation efficiently.

EVERYTHING YOU NEED TO KNOW

We offer you different modules of management systems, for you to get exactly the information you need to optimize your profits. Whether it is at herd level or you need to know data for the individual sheep or goat – SAC has a solution to let you know.

The **IDC** is a milking place unit ensures a good overview of the milking for you to keep focus on the animal, a good milk quality and good working conditions

“

Our 100 places external goat rotary from SAC really opens the doors for future growth.

Lars and Ingrid Steunenbrink
Canada

The Steunenbrink family in Ontario, Canada is milking with a 100 places external goat rotary from SAC. One of the key benefits is the milking efficiency and being able to milk close to 1.000 goats per hour. Also, the family experience a great value in the excellent bacto-scan results while using a minimal amount of cleaning agents.

FACTS ABOUT LARS AND INGRID STEUNENBRINK

- The farm is a family farm
- 750 goats are currently milked at the farm, and the family expects to grow in the future
- 225 hectares of land with hay, and 275 hectares of land with corn, wheat and beans
- Average milk yield per goat per year is 1.100 kilograms.

IMPROVE YOUR HERD MANAGEMENT

It is not only a matter of installing the parlour itself, it is more about getting a complete solution that utilizes the full potential of both you and your herd.

SAC supports you all the way, from optimizing the design and placement of your parlour to the daily work. We gladly support you with drawings and experienced advice to help you get the best solution. At SAC we listen to your needs and support you to get the best solution and to make the best outcome each day for many years ahead.

LOCAL SUPPORT THROUGH OUR NETWORK

Over the years, SAC has grown a network of local experts and organizations. In collaboration with our partners, we ensure you the proper support. Whether you are in the process of expanding your herd and business, or you simply want to adapt better to the market, you can get the help you need from SAC and our local partners.
